PRODUCT OVERVIEW

The SANLAND SDU RFoG F02 Optical Network Unit (R-ONU) for Single Dwelling Unit (SDU) applications support cost-effective deployment of full interactive video, voice, and data services over an RFoG network. SDU RFoG F02 enables multiple simultaneous upstream RF channel transmissions, enabling multiple MAC domains and full DOCSIS 3.0 channel usage to efficiently coexist, offering increased upstream bandwidth usage for RF returns as compared to non-OBI-free models.

The 19 dBmV RF output with AGC (Automatic Gain Control) supports a wide array of SDU designs, with a

5–42/65/85/204MHz return path using 1610 nm wavelength optics and a 54/87/105/258–1218MHz forward path on 1550 nm wavelength optics.
